

SCHERING-PLOUGH ANIMAL HEALTH TECHNICAL SERVICE BULLETIN

DIRECTIONS FOR USE OF GARASOL[®] CHICK INJECTION WITH MAREK'S VACCINE No. 224

1. Add 2 ml of Garasol (100 mg/ml) to 200 ml Marek's diluent bottle using a sterile syringe. For 1600 ml bags of diluent, add 16 ml of Garasol (100 mg/ml) and shake.
2. Mix the Marek's diluent and Marek's vaccine according to the manufacturer's directions.
3. Inject 0.2 ml of the Marek's Vaccine/Garasol mixture. This will deliver the correct dose of both Marek's vaccine and Garasol (.02 mg/chick).

CAUTION: Follow the procedure as outlined above being certain to:

Add the Garasol before Marek's virus, and use a separate syringe for the Garasol.

NOTE: If using the 50 mg/ml, Garasol volumes mentioned above will be increased to 4 ml.
