

Why Do Producers Need Ear Tags for Their Livestock?

ALLFLEX® ear tags provide producers with the tools to individually identify and manage each animal within a herd. This allows for more precise herd health records, resulting in improved decision-making, and ultimately leads to better health, wellbeing, and productivity for the animals.

ALLFLEX® is the Leader in Identification, Here's Why:

Superior Quality and Greater Retention:

- ALLFLEX® utilizes thicker materials resulting in increased durability, a longer product lifespan and minimal fading, making it the optimal choice for livestock management.
- Unique two-piece application allows tags to rotate and flex in the animal's ear to prevent rips or breaks.
- Multi-layered molded collar further improves tag retention by adding reinforcement to the neck of the tag.
- Unlike other brands, the ALLFLEX® tag number is both lasered on and filled with a permanent black ink to prevent fading.

Trusted Tools of the Trade:

- **The UTT3S Tagger is the premier applicator of the ear tag market.**
 - ALLFLEX® applicators are made of metal, providing longer-lasting durability than plastic competitors.
 - Replacement pins/tips are always included within the handle of the new applicator.
 - Designed to be easier on hands and joints after repeated use, with a curve in the handle to prevent pinching.
- **2-IN-1 Marking Pens**
 - Available in fade resistant black or white ink.
 - A specially-formulated, easy-to-hold pen with two marking tips (fine and broad).
 - Provides farmers and ranchers with an ID that is readable in the paddock for years.

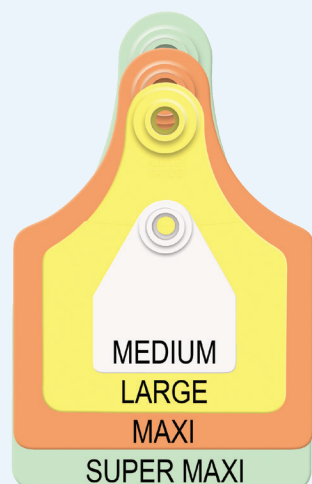

Permanent Laser Ink Marking:

- ALLFLEX® pre-numbered and custom ID tags feature laser ink marking that lasts the lifetime of the tag.
- ALLFLEX® custom ID tags offer a toolkit of sizes, colors, pre-numbered and blank tags that can serve the unique ways you sort, manage and market cattle.
- Custom tags can feature the producer's ranch name, brand, logo or numbering system in a crisp, clean, permanent laser-ink marking.
