

BRAVECTO[®]
QUANTUM
(fluralaner for extended-release
injectable suspension)

DON'T LET FLEAS AND TICKS *TRICK* THEIR WAY INTO YOUR HOME.

Treat your dog to the world's longest-lasting protection
with just 1 dose of **BRAVECTO[®] QUANTUM!**

IMPORTANT SAFETY INFORMATION: Fluralaner belongs to the isoxazoline class, which has been associated with neurologic adverse reactions (e.g., tremors, ataxia, and seizures). Seizures have been reported in dogs receiving isoxazoline class drugs, even without a history of seizures. Use with caution in dogs with a history of seizures or neurologic disorders. **BRAVECTO QUANTUM** is not effective against *Amblyomma americanum* (lone star tick) beyond 8 months after dosing. Hypersensitivity reactions, including anaphylaxis, have been reported and should be treated immediately with the same measures used to treat hypersensitivity reactions to vaccines and other injectable products. The safety of **BRAVECTO QUANTUM** has not been evaluated in breeding, pregnant and lactating dogs. Reproductive adverse events have been reported following use of BRAVECTO (fluralaner) Chews in breeding females. For use in dogs and puppies 6 months of age and older. The most commonly reported adverse reactions in a US field study include lethargy, decreased appetite, vomiting, diarrhea, elevated liver enzymes and pruritus. For complete safety information, refer to the product label.
