

Powerful Treatment + Gentle Action

Performance when it matters most.

PANACUR® (fenbendazole) POWERPAC is the only approved larvicidal treatment for all stages of encysted small strongyles¹ and is also effective against ivermectin-resistant ascarids that are so dangerous to young horses.²

Performance you can count on.

PANACUR® (fenbendazole) Paste 10% targets large and small strongyles, pinworms, and ascarids (roundworms) for dependable seasonal protection¹ and is also safe for foals along with pregnant mares and older horses.^{1,3}
