Keep Your Dog Safe from Intestinal Parasites

If your dog is at his happiest when he's outside,
you need **SAFE-GUARD® (fenbendazole)** to protect
him on the inside. **SAFE-GUARD** treats the 4 major
intestinal worm types common to the outdoor dog.

Treat More Worms

Why settle for less? Treat and control the
worms of greatest risk to the outdoor dog.

Using Fewer Drugs

SAFE-GUARD treats all these worms
with only one compound, fenbendazole.
So you can treat more with less,
minimizing your dog's chemical exposure.

With Proven Safety¹

SAFE-GUARD is safe for puppies 6 weeks
of age or older and pregnant females as
well as adult dogs of all breeds. So it's
never too early or too late to start.

Deworm More Effectively: Keep them Safe with Safe-Guard

Find out more about deworming at www.safe-guard-for-dogs.com

¹Data on file.

Consult your veterinarian for assistance in the diagnosis, treatment and control of parasitism.

IMPORTANT SAFETY INFORMATION: For animal use only. Do not use in pups younger than 6 weeks.
Do not deworm a dog or puppy that is sick. Approximately 1% of dogs had vomiting associated with
the use of this product.
