IN-FEED
ANTICOCCIDIALS

Ionophore resistance

Loss of efficacy

ELIMINATE THE ROADBLOCKS TO COCCIDIOSIS CONTROL

Chemical resistance

Increased input cost

Reseed houses
with susceptible
Eimeria strains

SpraycoxX cabinet
for precise dosing

Earlier immunity

No resistance build-up

Consistent flock-to-flock
coccidiosis control
for the long haul

COCCIVAC
Faster protection. Superior performance. **B52**

Coccivac-B52 provides effective coccidiosis control for the long haul. Unlike other forms of control, Coccivac-B52 delivers consistent flock-to-flock performance and flexibility that fits into any flock management program. Avoid the roadblocks to sustainable coccidiosis control with Coccivac-B52.
