*3-month extension excludes all Nobivac® Rabies vaccines.

For complete coverage, pets must have received an initial series and a 1-year booster where appropriate.
Steps for reporting an efficacy or product complaint to Merck Animal Health

1. **Contact Merck Animal Health Technical Services:** 1-800-224-5318 (Monday–Friday, 9:00AM–7:00PM EST)

2. **Provide the following details:**
   - Veterinary Clinic and Pet Owner contact information.
   - Patient ID: First and last name, along with species. If available: breed, DOB, weight, gender/neuter status.
   - Product information: product name, size, serial number, expiration date, and dates of vaccination.
   - Description of the problem: Start and end dates of clinical signs, treatment administered, and patient status.

3. **For efficacy complaints, Merck Animal Health may request diagnostics.**
   - Whenever possible, please contact Merck Animal Health (MAH) Technical Services before submitting diagnostic samples to discuss qualification for the Nobivac® Guarantee, and to discuss a diagnostic sampling plan.
   - Samples taken before contacting MAH Technical Services should be stored according to diagnostic laboratory recommendations.
   - MAH Technical Services will provide a diagnostic submission form and cover the cost of diagnostics when the conditions of the Nobivac® Guarantee are met.

**Program details**

- All pets must be vaccinated by, or under the supervision of, a licensed veterinarian with an established client-patient relationship. All vaccines must be administered in accordance with the labeled directions for administration and local regulations.
- Documentation of vaccination records must be maintained on file by the veterinarian and be available for review by Merck Animal Health. Vaccine records should include at a minimum, the vaccine brand, serial number, anatomical site, and the date(s) of vaccination.
- Veterinarians must collaborate with Merck Animal Health’s Technical Services Department in designing a diagnostic protocol for the pet: Phone: 1-800-224-5318 or email: uscompanionpv@merck.com
- Guarantee coverage may be subject to confirmatory diagnostics. Merck Animal Health is not responsible for lost diagnostic samples.
- The primary point of contact for the guarantee to be valid must be a veterinarian (or appropriate veterinary member).
- For the 1-year (+3 month) guarantee, 2-year (+3 month) guarantee, and the 3-year (+3 month) guarantees to be valid, all pets must have completed an age-appropriate initial vaccination series, with the Merck Animal Health vaccine being the most recent vaccine used in the series, unless otherwise specified.
- For the 3-year (+3 month) guarantee to be valid for 1-year licensed products, a booster vaccine must be administered at 1 year (can be given as early as 6 months in cats for HCP and HCPCh) after the initial series is completed before going to a 3-year interval.
- For all Nobivac® injectable vaccines: The guarantee becomes effective 3 weeks after the most recent vaccine administration date. Any case involving onset of disease within 3 weeks of final vaccination will be handled on a case-by-case basis by our Technical Services Department.
- Claims involving animal species other than those on the product label are not covered.
- Merck Animal Health reserves the right to require a signed release form from the pet owner before payments are made.
- Merck Animal Health’s determination of coverage will be final.
