

# ILEITIS PROTECTION, ALL THE WAY TO MARKET.

## DON'T SETTLE FOR 7 SHORT WEEKS OF PROTECTION.

**7 WEEKS DOI**  
COMPETITOR'S VACCINE

**20 WEEKS DOI**  
PORCILIS™ ILEITIS

WITH ITS 20-WEEK DOI,  
PORCILIS™ ILEITIS  
DELIVERS 13 MORE WEEKS  
OF PROTECTION THAN  
THE COMPETITION.\*

\*Frozen formulation; non-frozen formulation label does not include DOI

### ONE-DOSE, READY-TO-USE INJECTABLE VACCINE

AS THE ONLY INJECTABLE VACCINE  
AVAILABLE FOR ILEITIS, PORCILIS ILEITIS  
COMES IN A SINGLE BOTTLE.

- ⊘ NO PREPPING
- ⊘ NO MIXING
- ⊘ NO RISK OF  
CONTAMINATION

# PROTECTING THE GUT WITH AN INJECTABLE? MAKES SENSE.

Porcilis Ileitis is designed to work in the gut.<sup>1</sup> More importantly, the level of immunity in the gut is strong, based on the vaccine's ability to control ileitis by:

- Inducing *Lawsonia intracellularis* antibody titers
- Controlling ileitis lesions, both gross and microscopic
- Reducing colonization of *L. intracellularis*
- Reducing duration of fecal shedding

The proof? Longest duration of immunity on the market – 20 weeks.<sup>1</sup>

## THE LONGEST DOI ON THE MARKET

7 WEEKS DOI  
COMPETITOR'S VACCINE

20 WEEKS DOI  
PORCILIS™ ILEITIS

## OUR ADJUVANT IS THE DIFFERENCE.

- Merck Animal Health's proprietary Microsol Diluvac Forte® adjuvant system is designed specifically for pigs.
- Our adjuvant, also used in Circumvent® G2, has an impressive track record of creating longer and stronger immunity.
- When there's an actual real-world exposure, you can depend on a rapid response and long-lasting protection.

## DON'T JUST DEAL WITH DISEASE. CONTROL ILEITIS IN EVERY SINGLE PIG.

- An injectable vaccine ensures consistent dosing to control ileitis in every pig.
- Take your vaccination management even further with the new peel-off sticker that enables you to easily record when vaccinations are given.
